Abstracts

The global Vacuum Skin Packaging market size is expected to reach \$ 2845 million by 2032, rising at a market growth of 7.1% CAGR during the forecast period (2026-2032).

Vacuum Skin Packaging (VSP) is an outstanding solution for extending the shelf life of perishable food products, including fresh and processed meats, poultry and seafood, ready-to-eat meals, fresh produce and cheese.

The shelf life of a VSP package is nearly double that of a traditional MAP package, and close to four times longer than a stretch-wrapped product. Everyone benefits from longer shelf life: retailers will reduce their shrink, consumers will reduce their food waste.

The materials used to do VSP are PET, PE, PP, EPS etc.

The industry's gross profit margin is around 30%.

In 2024, global Vacuum Skin Packaging (VSP) production reached approximately 276.6 thousand tons, with an average global market price of around US\$ 5807 per ton.

Global Vacuum Skin Packaging main players are Sealed Air, Bemis Company, Winpak Ltd., Linpac Packaging, etc. Global top four manufacturers hold a share about 35%. North America is the largest market, with a share over 35%.

This report studies the global Vacuum Skin Packaging production, demand, key manufacturers, and key regions.
