## Abstracts

According to our (Global Info Research) latest study, the global Vacuum Skin Packaging market size was valued at US\$ 1527 million in 2024 and is forecast to a readjusted size of USD 2460 million by 2031 with a CAGR of 7.1% during review period.

Vacuum Skin Packaging (VSP) is an outstanding solution for extending the shelf life of perishable food products, including fresh and processed meats, poultry and seafood, ready-to-eat meals, fresh produce and cheese.

The shelf life of a VSP package is nearly double that of a traditional MAP package, and close to four times longer than a stretch-wrapped product. Everyone benefits from longer shelf life: retailers will reduce their shrink, consumers will reduce their food waste

The materials used to do VSP are PET, PE, PP, EPS etc.

Global Vacuum Skin Packaging main players are Sealed Air, Bemis Company, Winpak Ltd., Linpac Packaging, etc. Global top four manufacturers hold a share about 35%. North America is the largest market, with a share over 35%.
