Abstracts

According to our (Global Info Research) latest study, the global Valve Actuator market size was valued at USD 16240 million in 2023 and is forecast to a readjusted size of USD 21670 million by 2030 with a CAGR of 4.2% during review period.

A valve actuator is a mechanism valve used to open and close. Manually operated valves require someone to be present, using a direct or gear mechanism connected to the valve stem to adjust them. Electric actuators use air pressure, hydraulic pressure, or electricity to allow remote adjustment of the valve or allow rapid operation of large valves. Electric valve actuators may be the final element of an automatic control loop that automatically adjusts certain flow rates, liquid levels, or other processes. The actuator may only be used to open and close the valve, or it may allow intermediate positioning; some valve actuators include switches or other means to remotely indicate the position of the valve.

Key global players of Valve Actuator include Emerson, Rotork, Belimo, Siemens, AUMA, etc. Belimo is the biggest manufacturer with a share about 8%. The top 3 manufacturers of the world are Belimo, Emerson, Johnson Controls. In global, Asia-Pacific is the largest market. China makes up over a quarter of the global market share.
