Abstracts

The global Valve Interlock market size is expected to reach \$ 159.6 million by 2029, rising at a market growth of 4.3% CAGR during the forecast period (2023-2029).

Global 5 largest manufacturers of Valve Interlocks are Halma Group, Haake Technik, Alcatraz Interlocks, ENEX GROUP and Gloazure, which make up nearly 70%. Among them, Halma Group dominates with nearly 55% production value share, followed by Haake Technik (10%) and Alcatraz Interlocks (5%). Europe is the largest market, holding a share over 80%, followed by North America and Asia-Pacific, with shares 10% and 5% separately.

There are two product types of Valve Interlocks, including Handwheel Valve Interlock and Handle Valve Interlock. The leading type is Handwheel Valve Interlock, with a market share over 60%.

In terms of application, Valve Interlocks is mainly used in Oil and Gas, Power, Chemical, Water Treatment and others. The largest segment is Oil and Gas, accounting for nearly 40%.

A valve interlock is a trapped key lock assembly which locks the valve in one or two positions - open and/or closed - with one key trapped within the lock assembly and one key free. It's about controlling the sequence of events, conducting different valve process activities. To change the valve position (open-to-close or close-to-open), two keys need to be inserted into the lock assembly. The free key can only be released when the valve is in the open or closed position. Alter natively a 'single keyed interlock' only allows removal of the locked open or closed key when the valve is in the correct locking position.

This report studies the global Valve Interlock production, demand, key manufacturers, and key regions.
