Abstracts

The global Vcom Calibrators market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Vcom calibrators are adjustable solutions used during the manufacturing of thin-film transistor (TFT) liquid-crystal displays (LCDs), to remove “flicker”. They replace a mechanical potentiometer, so that the factory operator can physically view the front screen when performing the Vcom adjustment. This significantly reduces labor costs, increases reliability, and enables automation.

This report studies the global Vcom Calibrators production, demand, key manufacturers, and key regions.
