## Abstracts

Vegetable oil transformer is a transformer that uses vegetable insulating oil (natural ester insulating oil) as an insulating liquid. Natural ester insulating oil is made from renewable resources, more than 98% of which are vegetable oil, which is not toxic and dangerous in water and soil. It can be completely degraded within 28 days, which can effectively solve environmental problems in reservoirs, water surface photovoltaics, agricultural greenhouses, and other fields. This clean, green and environmentally friendly equipment is suitable for areas with high environmental protection requirements (such as offshore wind power, complementary fishing, solar power, tourist areas, charging piles, etc.).
