Vegetable transplanter is a machine that can transplant vegetable seedlings from the nursery to the field. It replaces the manual labor traditionally required for transplanting and allows for faster and more efficient planting.

The machine typically consists of a frame or chassis, a planting unit, and a conveyor system. The planting unit is equipped with various mechanisms such as seedling trays, seedling pickers, and planting tubes. The conveyor system moves the seedlings from the trays to the planting unit, where they are transferred to the ground at predetermined intervals and depths.
