Abstracts

The global Vehicle Camshaft market size is expected to reach \$ 3505 million by 2032, rising at a market growth of 2.9% CAGR during the forecast period (2026-2032).

Vehicle Camshaft is an important engine component in an automobile, from a technical standpoint, a Vehicle Camshaft fulfills the function of converting rotatory motion of crankshaft to oscillating motion of follower, through a cam profile. The camshaft uses lobes (called cams) that push against the valves to open them as the camshaft rotates; springs on the valves return them to their closed position. This is a critical job, and can have a great impact on an engine's performance at different speeds.

Global vehicle camshaft key players include ThyssenKrupp, MAHLE, Kautex Textron (CWC), Seojin Cam, Linamar, etc. Global top 2 manufacturers hold a share about 38%. Europe is the largest market, with a share about 30%, followed by China and North America, both with a share about 48 percent. In terms of product, assembled camshaft is the largest segment, with a share about 49%. And in terms of application, the largest application is passenger vehicle, followed by commercial vehicles.

This report studies the global Vehicle Camshaft production, demand, key manufacturers, and key regions.
