An on-vehicle NFC controller is a controller that applies near-field communication (NFC) technology, which is widely used for wireless communication and connection inside vehicles. Integrated in the vehicle's central control system or smart key, it enables car owners to realize functions such as intelligently unlocking the vehicle, starting the engine, wireless payment, transmitting vehicle information, and connecting to the on-board media system through a paired smartphone or smart card. In addition, car owners can also personalize vehicle settings by interacting with the on-board NFC controller, such as adjusting seat positions and selecting favorite music. The on-board NFC controller provides a more convenient, safe and intelligent in-vehicle experience, adds value-added functions for vehicle manufacturers, and further promotes the development and application of smart car technology.
