The global Vehicle Routing and Scheduling market size is expected to reach \$ 5823 million by 2032, rising at a market growth of 8.4% CAGR during the forecast period (2026-2032).

Vehicle routing and scheduling is a mature market. Fleet routing and scheduling solutions are specialized transportation management applications aimed at organizations that directly or indirectly control and manage shipping assets and resources. These tools are typically used to develop route plans that meet the delivery objectives at minimal cost/mileage based on the firm's input (such as from orders), rules and constraints. The aim is to minimize transportation costs while satisfying feasibility constraints as to when and where stops are made, what can be loaded in each vehicle, and what routes drivers can serve.

North America is the largest market with about 48% market share. Europe is follower, accounting for about 31% market share.

The key players are Verizon Connect, Omnitrac, Trimble, Paragon, Descartes, BluJay, Manhattan Associates, Ortec, JDA, Oracle, Mercury Gate International, SAP, Cheetah Logistics Technology, WorkWave, Carrier Logistics etc. Top 3 companies occupied about 42% market share.
