Veneer laminated plywood is a type of plywood that has a thin layer of decorative veneer bonded to the surface of the panel. The veneer can be made from a variety of different wood species, such as oak, maple, or cherry, and is usually applied using a glue adhesive. This process gives the plywood a more attractive appearance, similar to solid wood, while still maintaining the strength and durability of the plywood core. Veneer laminated plywood is commonly used in furniture, cabinetry, and other woodworking projects where a high-quality finish is desired.
