According to our (Global Info Research) latest study, the global Vented Gauge market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

A Vented Gauge is a sensor used to measure changes in pressure relative to atmospheric pressure. It is also known as an atmospheric gauge or zero gauge pressure sensor. A vent gauge pressure sensor is connected to the atmosphere and usually has a vent or vent line to allow it to equalize to the ambient air pressure. As the pressure changes, the sensor measures the difference relative to atmospheric pressure. Therefore, it provides a measurement of relative pressure rather than absolute pressure.
