## Abstracts

The global Vented Gauge market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A Vented Gauge is a sensor used to measure changes in pressure relative to atmospheric pressure. It is also known as an atmospheric gauge or zero gauge pressure sensor. A vent gauge pressure sensor is connected to the atmosphere and usually has a vent or vent line to allow it to equalize to the ambient air pressure. As the pressure changes, the sensor measures the difference relative to atmospheric pressure. Therefore, it provides a measurement of relative pressure rather than absolute pressure.

This report studies the global Vented Gauge production, demand, key manufacturers, and key regions.
