## Abstracts

According to our (Global Info Research) latest study, the global Vertical Disc Stack Separator market size was valued at USD 1081 million in 2023 and is forecast to a readjusted size of USD 1433.6 million by 2030 with a CAGR of 4.1% during review period.

Similar to a settling tank, disc stack separators use the force of gravity to separate liquid with a specific density from other liquids and solids. Unlike a settling tank which uses retention time as the main parameter for liquids of different densities to divide into layers and solids to precipitate to the tank, centrifugal separators use mechanical force to separate liquids and solids with different densities from each other.

Global core vertical disc stack separator manufacturers include Alfa Laval and GEA etc. The Top 2 companies hold a share above 50%. Asia Pacific is the largest market, with a share about 33%, followed by Europe and North America with the share about 32% and 25%.

The Global Info Research report includes an overview of the development of the Vertical Disc Stack Separator industry chain, the market status of Food (Liquid-Liquid Separation, Liquid-Solid Separation), Dairy (Liquid-Liquid Separation, Liquid-Solid Separation), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Vertical Disc Stack Separator.
