## Abstracts

According to our (Global Info Research) latest study, the global Vertical Gang Drilling Machine market size was valued at US\$ 782 million in 2025 and is forecast to a readjusted size of US\$ 1189 million by 2032 with a CAGR of 6.2% during review period.

In 2025, global Vertical Gang Drilling Machine production reached approximately 13.10 k units, with an average global market price of around US\$58,000 per unit.

The gross profit margin of major companies in the industry is between 28%–45%.

In 2025, the global production capacity of vertical gang drilling machines was approximately 17.47 k units.

Vertical Gang Drilling Machines are metalworking machine tools equipped with multiple drilling spindles arranged in a row on a vertical column, enabling simultaneous or sequential drilling of multiple holes on a workpiece. These machines improve drilling efficiency, positional accuracy, and production consistency, and are widely used in batch machining environments.

The industrial chain of Vertical Gang Drilling Machines includes upstream components such as cast iron or steel frames, spindles, motors, transmission systems, control units, and fixtures. The midstream focuses on machine tool design, structural manufacturing, assembly, and precision testing. Downstream applications cover automotive parts, machinery components, hardware products, metal fabrication, and industrial equipment manufacturing, supported by installation, commissioning, and maintenance services.

The vertical gang drilling machine market is driven by demand for higher efficiency and consistency in multi-hole machining operations. Automotive and machinery industries increasingly require precise and repeatable drilling for complex components. Gang drilling configurations reduce cycle time and labor dependence compared with single-spindle machines. Advances in spindle design, rigidity, and automation integration improve productivity and machining accuracy. Overall, the market is expected to grow steadily as manufacturers invest in efficient and cost-effective machining solutions.
