The global Vertical Single-screen Monitor Stand market size is expected to reach \$ 64.01 million by 2032, rising at a market growth of 7.9% CAGR during the forecast period (2026-2032).

In 2025, global sales of Vertical Single-screen Monitor Stands reached approximately 1.2 million units, with an average selling price of \$30 per unit. A Vertical Single-screen Monitor Stand is a device used to support and adjust the position of a monitor. It is typically designed as a stand-alone unit, offering height and angle adjustments to improve the user's viewing experience. These stands are widely used in offices, home offices, gaming spaces, and design workstations, meeting users' needs for comfort, health, and functionality. Their main functions include screen height adjustment, rotation, and tilt, designed to reduce neck and back discomfort that may occur during prolonged computer use.

The upstream raw materials for this product mainly include steel, aluminum alloys, plastics, and mechanical parts, primarily sourced from the metal processing and plastics manufacturing industries. Downstream suppliers mainly serve office equipment vendors, home furnishing retailers, electronics retailers, and online e-commerce platforms. Total production capacity is projected to reach 1.6 million units, with a gross profit margin of 20%. Downstream consumption primarily comes from office and home users, while upstream material consumption relies on a stable supply of metal and plastic raw materials. With the increasing prevalence of remote working and flexible work styles, the demand for ergonomically designed products continues to grow, driving the development of the vertical monitor stand market.

In the future, with technological advancements, vertical monitor stands may gradually

integrate more functions, such as wireless charging and USB ports, enhancing ease of use and versatility. With the increasing trend towards healthy office environments and efficient work, the market demand for vertical single-screen monitor stands will further grow, presenting significant business opportunities.
