## Abstracts

The global Vertical Top Loading Cartoning Machine market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

According to our “Construction Machinery” research center, sales of construction machinery in Europe increased by 24% in 2021, and in 2022 the construction machinery revenue in Europe was about US\$ 22 billion, while the US market sold about \$36 billion in construction machinery in 2022. China's construction machinery has complete categories and outstanding advantages, with 20 categories, 109 groups, 450 models, 1090 series and tens of thousands of models of product equipment. By the end of 2021, the number of major products of construction machinery in China was about 5.61 million to 6.08 million units. According to our “Construction Machinery” research center, the total sales of the top 50 global construction machinery manufacturers in 2022 reached US\$ 220 billion. And Asian companies occupied an absolute advantage, accounting for 50% of revenue, followed by Europe and North America, accounting for 26% and 23%.

Top loading equipment is becoming more and more popular in carton packaging. Flexible cartoners load from above and are more flexible than horizontal machines. Robotic arms can be equipped with different vacuum grippers to suit widely varying products. This solution also works well for composite packaging, for example in medicine, where blister packs, ampoules, vials, drug instructions and scoops can all be packaged with top-loading equipment. In the confectionery sector, top-loading equipment is used to place a wide variety of different shapes of chocolate in deep pans. The flexibility of top-loading equipment operation is equally effective with larger packages. The machine can adapt to different container shapes with only minor adjustments. This means that new product types can meet future requirements.
