Abstracts

The degaussing system is used to reduce the ship's effect on the earth's magnetic field by preventing the generation of the magnetic disturbances.

Scope of the Report:

Asia Pacific is the largest market for degaussing system. Territorial disputes in the South China Sea has led to the increased procurement of advanced degaussing systems in this region. The polarization of military power along the East and West coast of the Pacific Ocean and the Asia Pacific region has led to increased defense spending on the modernization of defense equipment to strengthen the protection of naval vessels. The need to modernize naval fleets has contributed to the integration and development of degaussing systems in Asia Pacific countries, thereby driving the growth of the degaussing system market in this region. China, South Korea, and Japan are the key markets for degaussing systems in the Asia Pacific region.

The worldwide market for Vessel Degaussing System is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
