Veterinary Banqing Granules is a veterinary Chinese herbal granular formulation primarily containing Isatis root (Ban Lan Gen) and Dyers' Woad Leaf (Da Qing Ye), known for its heat-clearing, detoxifying, antiviral, and immune-boosting properties. The active compounds (e.g., indirubin from Isatis root, flavonoids from Dyers' Woad) target viral infections (e.g., influenza, canine distemper, avian flu) and bacterial co-infections (e.g., respiratory syndromes) in livestock (pigs, poultry) and pets (dogs, cats). The granule form allows easy administration via drinking water or feed, effectively alleviating fever, cough, and sore throat. As a natural veterinary drug, it plays a critical role in reducing antibiotic overuse, controlling epidemics, and enhancing productivity, making it ideal for intensive farming systems.
