Veterinary Maxingshigan Drug is a granular veterinary traditional Chinese medicine (TCM) formulation derived from the classical prescription 'Maxing Shigan Tang,' composed of four herbal ingredients: Ephedra (Ma Huang), Bitter Apricot Seed (Xing Ren), Gypsum (Shi Gao), and Licorice (Gan Cao). It functions to clear heat, detoxify, and relieve lung congestion, making it effective against respiratory diseases such as cough, asthma, bronchitis, and pneumonia in livestock (e.g., pigs, cattle, sheep) and pets (e.g., dogs, cats) caused by wind-heat invasion or lung heat syndrome. The granules are produced using modern extraction and concentration techniques for easy administration. Its therapeutic mechanisms include pathogen inhibition, anti-inflammatory effects, expectorant action, and immune modulation, reducing reliance on antibiotics. As a natural and convenient alternative, Veterinary Maxingshigan Granules align with antibiotic-free farming and sustainable animal husbandry practices.
