Veterinary medicine is the branch of medicine that deals with the prevention, diagnosis and treatment of disease, disorder and injury in non-human animals. The scope of veterinary medicine is wide, covering all animal species, both domesticated and wild, with a wide range of conditions which can affect different species.

The animal drugs market is projected to experience significant growth in the foreseeable future. Factors such as increasing pet ownership, growing demand for livestock products, and the prevalence of animal diseases drive market growth. The market is highly competitive, with several pharmaceutical companies involved in the production and distribution of animal drugs. However, challenges such as stringent regulatory requirements, concerns about antibiotic resistance, and limited accessibility in developing regions may hinder market expansion. Nonetheless, the animal drugs market holds promising opportunities, fueled by the need for effective treatments and preventive measures for animal health, and the growing focus on animal welfare and food safety.
