According to our (Global Info Research) latest study, the global Veterinary MRI Systems market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Magnetic resonance imaging (MRI) is a sophisticated 3D imaging technique, which has been a widely used clinical diagnostic tool over the last two decades. MRI measures and records changes in the magnetic property of protons present in the cellular water. Unlike X-rays, MRI does not require the use of ionizing radiation. For imaging, an MRI device uses radio waves and the magnetic field such as pulsed electromagnetic field in order to excite protons present in the area of interest. In developed regions/countries such as the U.S. and Europe, 7 Tesla and 11 Tesla MRI are among the widely used imaging techniques. Veterinary MRI is now seen as a gold standard technique for brain and spinal examination of animals with spinal disk herniation, trauma of the brain and spine, brain tumors, strokes, and brain malformations. Additionally, MRI is seen as a powerful technique for examining tendon- and ligament-related ailments. In case of chronic wounds and draining tracts, MRI imaging helps identify foreign bodies within the wound. This has effectively contributed in increasing the market for veterinary MRI systems in various applications segments.

According to Our PET Supplies Research Center, the global pet industry reached \$ 261 billion in 2022, a year-on-year increase of 11.3%. The United States gains the highest pet penetration rate and becomes the largest pet market. According to the American Pet Products Association (APPA), 66% of American households keep pets, and the total industry sales was about US\$136.8 billion, an increase of 10.8% over 2021. According to IVH, the German pet products industry association, the number of pets in Germany

reached 33.4 million in 2022, with a total turnover of nearly ?6.5 billion. The 2023 China Pet Industry Trend Insight White Paper released by JD shows that the market size of the four major pet physical commodities is increasing year by year: pet supplies account for 45%, pet staple food accounts for nearly 35%, pet snacks account for 12%, and pet medicine and health care account for 87%.
