Abstracts

The global VHF Radio Sets market size is expected to reach \$ 1052 million by 2032, rising at a market growth of 6.9% CAGR during the forecast period (2026-2032).

VHF Radio Sets are devices that utilize the very high frequency (VHF) band (30-300MHz) for wireless signal transmission and reception. The electromagnetic waves in this frequency band mainly propagate in straight lines, and the propagation distance is usually limited by the line of sight. However, under certain specific conditions (such as atmospheric refraction), the propagation distance may increase. It has the characteristics of high communication quality, relatively simple equipment, and low cost, and is widely used in multiple fields. It is an important tool for achieving short-range wireless communication.

This report studies the global VHF Radio Sets production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for VHF Radio Sets and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
