According to our (Global Info Research) latest study, the global Video Banking Service market size was valued at US\$ 84790 million in 2024 and is forecast to a readjusted size of USD 208420 million by 2031 with a CAGR of 13.9% during review period.

Video Banking is a term used to enable people to manage their bank account and transactions with the help of a stable online connection.

The global video banking service market growth is being driven by the following factors:

Rising adoption of video conferencing technology: Video conferencing technology is becoming increasingly popular for a variety of purposes, including business meetings, education, and healthcare. This trend is also being seen in the banking industry, where video banking services are being offered as a way for customers to interact with their banks remotely.

Growing demand for convenience: Video banking services offer a convenient way for customers to bank, without having to visit a physical branch. This is especially appealing to customers who are busy or who live in remote areas.

Increased security: Video banking services offer a secure way for customers to bank, as their transactions are encrypted and transmitted over a secure network. This is important to customers who are concerned about the security of their financial information.

Improved customer service: Video banking services can help banks to improve their

customer service by providing customers with a more personalized and interactive experience. This can lead to increased customer satisfaction and loyalty.
