Abstracts

An intercom (intercommunication device), talkback or doorphone is a stand-alone voice communications system for use within a building or small collection of buildings, functioning independently of the public telephone network (Azori 2016). Intercoms are generally mounted permanently in buildings and vehicles. Intercoms can incorporate connections to public address loudspeaker systems, walkie talkies, telephones, and to other intercom systems. Some intercom systems incorporate control of devices such as signal lights and door latches.

Video intercom devices are intercom devices which use video method.

Scope of the Report:

This report studies the Video Intercom Devices market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Video Intercom Devices market by product type and applications/end industries.

First, for industry structure analysis, the video intercom devices industry is not concentrated. The top five producers account for about 46% of the revenue market in 2016. Regionally, Asia is the largest production area of video intercom devices, and China and Japan are the main production country of video intercom devices in China. Compared with Japan produced products, video intercom devices produced in China are cheap and large volume

Second, the production of video intercom devices increases from 11.14 Million Units in 2012 to 14.16 Million Units in 2016, with an average growth rate of more than 5.5%.

Third, China is the largest consumption region of video intercom devices, which occupied 36% of the sales market in 2016. It is followed by North America and Europe, which respectively have around 19.5% and 17% of the global total industry.

Fourth, for price trend analysis, a key variable in the performance of video intercom devices producers is components and raw material costs, specifically the speed at which any increase can be passed through to customers.

Fifth, for forecast, the global video intercom devices revenue would keep increasing with annual growth rate with 3~5%. We tend to believe that this industry still has a bright future, considering the current demand of video intercom devices driven by urbanization in developing countries. As for product prices, the slow downward trend in recent years will continue in the next few years, as competition intensifies. Similarly, there will be fluctuations in gross margin.

The global Video Intercom Devices market is valued at 1820 million USD in 2017 and is expected to reach 2370 million USD by the end of 2023, growing at a CAGR of 4.5% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Video Intercom Devices.
