Abstracts

Vinblastinesulphate is a white or light yellow amorphous power, which is easily soluble in water. Vinblastine belongs to the group of cancer-fighting medications known as antineoplastics. Vinblastine is used alone or in combination with other antineoplastic medications to treat many different types of cancer including Hodgkin's disease, non-Hodgkin's lymphoma (cancer of the lymph cells), Kaposi's sarcoma, breast cancer, and testicular cancer. It kills cancer cells by interfering with the genetic material DNA, which is necessary for their growth and reproduction.
