According to our (Global Info Research) latest study, the global Vinyl Laminated Fabric market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Vinyl laminated fabric is a type of fabric that has a layer of vinyl or polyvinyl chloride (PVC) laminated onto its surface. This lamination process creates a waterproof and durable material that is commonly used in various applications such as upholstery, bags, outdoor furniture, and protective covers.

The vinyl layer provides the fabric with resistance to water, stains, and UV rays, making it suitable for outdoor use. It also adds strength and durability to the fabric, making it less prone to tearing or fraying. Additionally, vinyl laminated fabric is easy to clean and maintain, as it can be wiped down with a damp cloth or mild detergent.

Vinyl laminated fabric comes in a wide range of colors, patterns, and textures, allowing for versatility in design and style. It is often used as a substitute for leather or other natural materials due to its lower cost and ease of maintenance.
