## Abstracts

The fiber invented in Japan and grown world-wide. This is a vinylon fiber. This fiber is said to be the most similar to cotton fibers since vinylon fiber is most moisture absorbent among synthetic fibers. Vinylon fiber is widely used for industrial, agricultural, fishing uses, because it is light in weight, durable and resistant to weathering. Vinylon is resistant to heat and chemicals but has several disadvantages, being stiff, having a relatively high manufacturing cost, and being difficult to dye.
