Vynlon staple fiber is a synthetic fiber, also known as polyester staple fiber. It is a fiber made of polyester resin through a spinning process. Vynlon fiber is a valuable functional and differentiated fiber with high strength, low elongation, high modulus, acid and alkali resistance, weather resistance, and moisture absorption. In the early days, it was mainly blended with cotton to make clothing products, and can also replace some cotton to make bedding, knitted underwear, decorative fabrics, canvas, work clothes, fish nets, curtains, etc. At present, polyvinyl chloride fibers have been deeply developed and used in more and more fields, among which water-soluble fibers and high-strength high film fibers are the characteristic varieties of polyvinyl chloride.
