A string is the vibrating element that produces sound in string instruments such as the guitar, harp, piano (piano wire), and members of the violin family. Strings are lengths of a flexible material that a musical instrument holds under tension so that they can vibrate freely, but controllably. Strings may be 'plain', consisting only of a single material, like steel, nylon, or gut, or wound, having a 'core' of one material and an overwinding of another. This is to make the string vibrate at the desired pitch, while maintaining a low profile and sufficient flexibility for playability. From high to low, the strings on the violin are E, A, D, and G. They are made from a variety of materials including Gut Strings, Steel Strings, Synthetic Strings.
