Abstracts

Virgin Coconut Oil (VCO) is growing in popularity as functional food oil and the public awareness of it is increasing. It is expected that VCO will experience a dramatic growth in the market.

Virgin Coconut Oil (VCO) is extracted from fresh coconut milk obtained from mature kernel (12 months old from pollination) of coconut by mechanical or natural means, with or without the application of heat, which does not lead to alteration of the nature of the oil. VCO can be consumed in its natural state without the need for further processing. Hence, VCO does not undergo chemical refining, bleaching or deodorizing. Virgin coconut oil is colorless, free of sediment and has natural fresh coconut scent. It is free from rancid odor or taste. Virgin coconut oil consists mainly of medium chain fatty acids. The fatty acids in virgin coconut oil are distinct from animal fats which mainly consist of long chain saturated fatty acids.

Virgin coconut oil consists mainly of medium chain fatty acids. The most important medium chain fatty acid found in VCO is lauric acid. It constitutes 48 % of VCO. Lauric acid possess powerful anti microbial properties capable of destroying disease causing bacteria, fungi, viruses and parasites. Researches show that the presence of medium chain fatty acids in mother's milk is the primary ingredient that protects new born infants from infections for the first few months of their life, while their immune system is still developing. Dr. Jon J Kabara, Ph.D of Michigan State University and Consultant, NORTH AMERICA has done pioneered studies on the antimicrobial properties of fatty acids in the 1980s. Two of his most important conclusions are that lauric acid is the most active antimicrobial fatty acid and that monolaurin is the most effective antimicrobial compound that can be derived from coco chemicals. According to him, medium chain fats in coconut oil are similar to fats in mother's milk and have similar

nutriceutical benefits. VCO has considerable potential for therapeutic uses such as antimicrobial, anti-HIV/AIDS drug, for anti-cancer therapy and for the treatment of Alzhiemer?s disease. '
