According to our (Global Info Research) latest study, the global Virtual Commissioning market size was valued at USD 637.8 million in 2023 and is forecast to a readjusted size of USD 1646.4 million by 2030 with a CAGR of 14.5% during review period.

Virtual commissioning is the creation of a digital replica of a physical manufacturing environment. The process involves using simulation technology to test new equipment and make changes to existing systems in a 3D virtual environment before they are made in the physical plant. Once the simulation has been programmed, every aspect of the system can be tested in a virtual world to ensure that, when it is physically installed, all other systems in the plant integrate with it correctly. If further changes are required, these can be made and tested in the simulation.

Global virtual commissioning includes Siemens, Rockwell Automation, etc. Global top 5 companies hold a share over 70%. Europe is the largest market, with a share about 50%, followed by North America and Asia-Pacific with the share about 34% and 12%.
