Abstracts

According to our (Global Info Research) latest study, the global Virtual-First Care market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Virtual-first care is a telehealth trend that’s emerged in the past few years. Virtual-first care directs patients to a video visit, call, or other digital interaction with a clinician before or instead of an in-person visit. Payers, self-insured employers, and some providers use virtual-first care in primary and urgent care settings to more easily triage the patient’s care needs, determine the best care setting from in-person to virtual, and drive follow-up. There are similar applications for this use of technology in niche areas of telehealth like behavioral health and dermatology.

This report is a detailed and comprehensive analysis for global Virtual-First Care market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2023, are provided.

Key Features:
