Abstracts

An online school (virtual school or e-school or cyber-school) teaches students entirely or primarily online or through the internet. An online school can mimic many of the benefits provided by a physical school (learning materials, online exercises, self-paced courses, live online classes, tests, web forums, etc) but delivers these through the internet. Physical interaction by students and teachers is unnecessary, or only supplementary. Online schools may also enable individuals to earn transferable credits or to take recognised examinations, to advance to the next level of education.
