According to our latest research, the global Volumetric Modulated Arc Therapy(VMAT) market size will reach USD 397 million in 2031, growing at a CAGR of 8.4% over the analysis period.

Volumetric modulated arc therapy (VMAT) is an advanced radiotherapy technique that uses arcs of radiation, rather than individual beams used in other types of radiotherapy. As the machine (called a linear accelerator or linac) moves, it automatically changes the beam shape and treatment dose. This makes the treatment much more targeted and accurate than single beam-based radiotherapy.
