Abstracts

Volumetric dispensing systems are used for liquid and high-viscosity materials with mono- or two-components in a variety of dispensing processes, including potting, gluing, and conformal coating. This dispenser for applications that require highest accuracy and a maximum control of material viscosity. The all-electronic dispensers whose dispensing pressure, temperature and retract vacuum are program-controlled rely on time-pressure-technology. This allows reliable dispensing of very small dots and lines of liquid to pasty material either as 1K-type or 2K-type.
