Vomit absorbent is a substance or material that is used to absorb and contain vomit. It is commonly used in hospitals, nursing homes, schools, and other public places to quickly and effectively clean up and prevent the spread of infectious diseases.

Vomit absorbents are typically made of superabsorbent polymers or absorbent powders that can quickly absorb liquid and solid waste. These materials are designed to solidify the vomit, making it easier to clean up and reducing the risk of contamination.

Vomit absorbents are available in various forms, including powders, granules, and pads. They are often used in conjunction with disposable vomit bags or containers to provide a hygienic and convenient solution for managing vomit.
