According to our (Global Info Research) latest study, the global VSAT Maritime Satellite Communication market size was valued at US\$ 66.8 million in 2024 and is forecast to a readjusted size of USD 135 million by 2031 with a CAGR of 10.7% during review period.

A VSAT maritime satellite communication is wireless internet beamed down from satellites orbiting the Earth. In addition, it is much faster from some common service providers and is different from land-based internet services such as cable or DSL, which transmit data through wires. In addition, satellite internet works by using radio waves to communicate with satellites orbiting the Earth. Furthermore, it is the only internet service that is available nationwide and is often the only way to get online for remote islands and ships sailing on seas.

The Global Mobile Economy Development Report 2023 released by GSMA Intelligence pointed out that by the end of 2022, the number of global mobile users would exceed 5.4 billion. The mobile ecosystem supports 16 million jobs directly and 12 million jobs indirectly.

According to our Communications Research Centre, in 2022, the global communication equipment was valued at US\$ 100 billion. The U.S. and China are powerhouses in the manufacture of communications equipment. According to data from the Ministry of Industry and Information Technology of China, the cumulative revenue of telecommunications services in 2022 was ?1.58 trillion, an increase of 8% over the previous year. The total amount of telecommunications business calculated at the price of the previous year reached ?1.75 trillion, a year-on-year increase of 21.3%. In the same year, the fixed Internet broadband access business revenue was ?240.2 billion,

an increase of 7.1% over the previous year, and its proportion in the telecommunications business revenue decreased from 15.3% in the previous year to 15.2%, driving the telecommunications business revenue to increase by 1.1 percentage points.
