## Abstracts

According to our (Global Info Research) latest study, the global VSFF Connectors market size was valued at US\$ 77.5 million in 2024 and is forecast to a readjusted size of USD 172 million by 2031 with a CAGR of 11.9% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

The VSFF connector, which stands for 'Very Small Form Factor Connector', is perfect for use in data centers that hold a lot of information and is the next evolution in fiber optics interconnects. What makes the VSFF connector special is that it's a lot smaller and takes up less space than the usual connectors, like the Duplex LC and MTRJ. VSFF connectors have multiple fibers but provide better density for infrastructure cabling systems and faster deployment speed.
