Abstracts

According to our (Global Info Research) latest study, the global Wafer Packaging Materials market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Wafer packaging is to cut the wafer of the previous wafer process into small wafers (Die) after the dicing process, and then mount the cut wafer on the island of the corresponding substrate (lead frame) frame, and then use ultra-fine Use metal (gold, tin, copper, aluminum) wire or conductive resin to connect the chip's pad (BondPad) with the corresponding pin (Lead) of the substrate to form the required circuit; Encapsulation and protection, a series of operations are required after plastic encapsulation. After packaging, the finished product is tested, usually through incoming, testing and packaging procedures. Various semiconductor materials are used in the packaging process. Commonly used packaging materials include lead frames, packaging substrates, ceramic packaging materials, bond wires, packaging materials, and die bonding materials.

Following a strong growth of 26.2 percent in the year 2021, WSTS revised it down to a single digit growth for the worldwide semiconductor market in 2022 with a total size of US\$580 billion, up 4.4 percent. WSTS lowered growth estimation as inflation rises and end markets seeing weaker demand, especially those exposed to consumer spending. While some major categories are still double-digit year-over-year growth in 2022, led by Analog with 20.8 percent, Sensors with 16.3 percent, and Logic with 14.5 percent growth. Memory declined with 12.6 percent year over year. In 2022, all geographical regions showed double-digit growth except Asia Pacific. The largest region, Asia Pacific, declined 2.0 percent. Sales in the Americas were US\$142.1 billion, up 17.0%

year-on-year, sales in Europe were US\$53.8 billion, up 12.6% year-on-year, and sales in Japan were US\$48.1 billion, up 10.0% year-on-year. However, sales in the largest Asia-Pacific region were US\$336.2 billion, down 2.0% year-on-year.
