According to our (Global Info Research) latest study, the global Wafer Shippers and Carriers market size was valued at USD 723.3 million in 2023 and is forecast to a readjusted size of USD 1207 million by 2030 with a CAGR of 7.6% during review period.

Wafer Shippers and Carriers are the containers to transfer the wafers safely. The Wafer Shippers and Carriers can be opened and closed with the help of robot to support the existing automation in the wafer transport and shipping. The Wafer Shippers and Carriers must comply with the semiconductor industry standards such as M31, E15.1, E57, E62 and others. The wafer transport box is so designed that it increases the wafer position accuracy along with its operability. The wafer transport box offers removable gasket that provides protection for external contamination. The wafer shipping boxes, or wafer transport box are packaged in horizontal wafer shippers and vertical wafer shippers. The advanced wafer transport boxes offer benefits over the traditional mid-range and low range wafer carriers. Some of them includes precise wafer access, reliable equipment operation with automated handling systems and secured wafer protection against damage and contamination.

Global 5 largest manufacturers of Wafer Shippers and Carriers are Entegris, Shin-Etsu Polymer, Miraial, Chuang King Enterprise and 3S Korea, which make up about 96%. Among them, Entegris is the leader with about 54% market share.
