## Abstracts

The global Wafer Transport Boxes market size is expected to reach \$ 1177.5 million by 2029, rising at a market growth of 6.7% CAGR during the forecast period (2023-2029).

Global key players of wafer transport boxes include Entegris, Shin-Etsu Polymer, Miraial, Chuang King Enterprise and Gudeng Precision. The top five players hold a share about 95%. North America is the largest production region, has a share about 55%, followed by Japan and China, with share 36% and 7%, respectively. The largest market is Asia-Pacific, with a share about 73%, followed by North America and Europe, with share 20% and 5%, separately. In terms of product type, In-process wafer transport boxes are the largest segment with about 73% share, while in terms of downstream, 300mm wafers are the largest downstream segment with 98% share.

Wafer Transport Boxes are the containers to transfer the wafers safely. The Wafer Transport Boxes can be opened and closed with the help of robot to support the existing automation in the wafer transport and shipping. The Wafer Transport Boxes must comply with the semiconductor industry standards such as M31, E15.1, E57, E62 and others. The wafer transport box is so designed that it increases the wafer position accuracy along with its operability. The wafer transport box offers removable gasket that provides protection for external contamination. The wafer shipping boxes, or wafer transport box are packaged in horizontal wafer shippers and vertical wafer shippers. The advanced wafer transport boxes offer benefits over the traditional mid-range and low range wafer carriers. Some of them include precise wafer access, reliable equipment operation with automated handling systems and secured wafer protection against damage and contamination.
