The global Wall-Hung Double Washbasin market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A wall-mounted double vanity is a common type of bathroom vanity that is designed to hang on the bathroom wall instead of resting on a counter or cabinet. It usually consists of two washbasins, each with a faucet and drain that can be used by two people at the same time. Wall-mounted double vanities are often more space-efficient than traditional under-counter vanities because they don't need to sit on a cabinet or counter. They also make cleaning easier, since there are no cabinets or counters under the walls, and cleaners can more easily clean floors.
