Wall Mounted Extractor Fan is a device designed to be installed on a wall, typically in a kitchen, bathroom, or any other enclosed space where ventilation is required. Its primary function is to extract air and odors from the room, expelling them outside through a duct or venting system. These fans typically consist of a motor-driven fan blade encased within a housing, with an intake grill on one side to draw in air from the room and an outlet or exhaust port on the other side to expel the air. The fan is mounted securely to the wall, often with brackets or screws, and can be connected to a ductwork system that leads to the outdoors.
