According to our (Global Info Research) latest study, the global Warm Up Suits market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A tracksuit is an article of clothing consisting of two parts: trousers and a jacket usually with front zipper. It was originally intended for use in sports, mainly for athletes to wear over competition clothing (such as running shirt and shorts or a swimsuit) and to take off before competition. In modern times, it has become commonly worn in other contexts.

It is also known as a warm-up suit, as they are intended for athletes to keep their bodies warm before or after competition, and during breaks (especially important in cold weather). In almost all cases, sports teams will wear these garments using a fabric that matches their official team, school, or country colors. The bottoms of tracksuits are also known as sweatpants.
