Abstracts

Washer-disinfectors (WDs) are defined by the Food and Drug Administration (FDA) as Class II medical devices intended for general medical purposes to clean, decontaminate, disinfect and dry surgical instruments, anesthesia equipment, hollowware and other medical devices.

Scope of the Report:

This report focuses on the Washer-Disinfectors in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
The technical barriers of washer-disinfectors are not high, and the major players are Steelco SpA, Miele, Belimed, Getinge Infection Control, Steris, AT-OS, CISA, SciCan, Tuttnauer, Eschmann Equipment, Skytron, IC Medical GmbH, Ken A/S, and Smeg Instruments. These companies mainly concentrate in Europe and USA. Europe is the largest consumer, more than 44% of total consumption in 2015.
In the past few years, the price of washer-disinfectors has decreased and we expect the price will slightly lower. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of washer-disinfectors.
As the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality. With the snatch for market share in emerging regions, the competition in washer-disinfectors industry will become more intense.
The worldwide market for Washer-Disinfectors is expected to grow at a CAGR of roughly 3.2% over the next five years, will reach 290 million US$ in 2023, from 240
