Waste-based Biodiesel, Advanced biodiesel are the fuels produced from bio based feedstock such as agricultural residues, forest residues or municipal solid wastes. Biofuels are classified into first generation biofuels and second generation biofuels depending on feedstock and method of production. First generation biofuels are produced from raw materials such as sugar and vegetable oils. On the other hand, second generation biofuels are called as advanced biofuels and these advanced biofuels are derived from non-food biomass.
