The global Waste-based Biodiesel market size is expected to reach \$ 3348.2 million by 2029, rising at a market growth of 2.2% CAGR during the forecast period (2023-2029).

Waste-based Biodiesel, Advanced biodiesel are the fuels produced from bio based feedstock such as agricultural residues, forest residues or municipal solid wastes. Biofuels are classified into first generation biofuels and second generation biofuels depending on feedstock and method of production. First generation biofuels are produced from raw materials such as sugar and vegetable oils. On the other hand, second generation biofuels are called as advanced biofuels and these advanced biofuels are derived from non-food biomass.

This report studies the global Waste-based Biodiesel production, demand, key manufacturers, and key regions.
