SCOPE OF THE REPORT:

The Waste Treatment Disposal industry concentration is not high; there are so many players in the world, and high-end technology mainly from U.S. and Western European. Global giant manufactures mainly distributed in U.S. and E.U. The manufacturers in U.S. have a long history and unshakable status in this field. Players such Waste Management and Republic Services have relative higher level of product's quality. As to France, Veolia Environment has become as a global leader.

Many companies have several plants, usually locate in the place close to aimed consumption region. There are international companies set up factories in China either. Some companies usually take a joint venture enter into aim market.

The key sales markets locate at developed countries. The United States takes the market share of 31.4%, followed by Europe with 24.6%. China's consumption market has a quicker growing speed of CAGR 5% from 2012 to 2017.

We tend to believe this industry becomes more and more mature, and the consumption increasing rate will show a smooth curve.

The market is not only influenced by the price, but also influenced by the service performance. Although China domestic companies have price advantage, the service is narrow to some extent.

Looking to the future years, the fluctuation of price trend in recent years will maintain. As competition intensifies, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross margin.

Company mergers and acquisitions, and inter-companies cooperation have occurred for development and growth. As the downstream consumption usually follows with developed and rapid economic growth areas, such as BRICS, the developed areas' company prefers investing to underdevelopment regions these years.

This industry is affected by the economy and policy, so it's important to put an eye to economic indexes and leaders' prefer. With the global economic recovery, more and more people pay attention to rising environment standards, especially in underdevelopment regions that have a large population and fast economic growth, the need of Waste Treatment Disposal will increase.

The worldwide market for Waste Treatment Disposal is expected to grow at a CAGR of roughly 3.1% over the next five years, will reach 1478100 million US\$ in 2024, from 1234300 million US\$ in 2019, according to a new GIR (Global Info Research) study.
