According to our (Global Info Research) latest study, the global Water-Based Epoxy Emulsion market size was valued at US\$ 1172 million in 2025 and is forecast to a readjusted size of US\$ 1876 million by 2032 with a CAGR of 7.0% during review period.

Water-based epoxy emulsion is a specialized chemical product containing reactive epoxy groups and based on bisphenol A epoxy resin, dispersed in water. It has extremely low volatile organic compound (VOC) emissions, complying with environmental regulations. It also offers excellent adhesion, corrosion and chemical resistance, superior mechanical properties, high viscosity, and unlimited water dispersibility. It is widely used in the production of coatings such as building cement mortar, industrial paint, and construction machinery primer.

Globally, market drivers include increasing environmental regulations, consumer demand for eco-friendly products, industrialization, and infrastructure development. Global governments are increasingly stringently regulating volatile organic compound (VOC) emissions. Water-based epoxy emulsions, due to their low VOC properties, have become the preferred choice in industries such as construction cement mortar. Increased consumer and business interest in environmentally friendly and healthy products is driving growth in the water-based epoxy emulsion market. With the acceleration of global industrialization and the growth of infrastructure construction, demand for water-based epoxy emulsions is also increasing. While water-based epoxy emulsions offer many advantages, they have performance limitations in certain applications, particularly those requiring high temperatures or extreme chemical environments. Furthermore, production costs for water-based epoxy emulsions are high, and some technologies are not yet fully mature. Regionally, North America is the

largest market for water-based epoxy emulsions, driven by stringent environmental regulations and growing demand from the construction and coatings industries. The European market is also strongly driven by environmental regulations. With the accelerated industrialization and urbanization in countries like China and India, the Asia-Pacific region has become the fastest-growing region for the waterborne epoxy emulsion market. The markets in Latin America and the Middle East are relatively small, but with the development of infrastructure and industrialization, the market prospects for waterborne epoxy emulsions are also gradually improving.
